

... einfach verpackt!

A detailed close-up photograph of industrial machinery, likely a packaging machine. The image shows various metallic components, including pneumatic cylinders, valves, and sensors, all interconnected with a network of blue and green hoses and wires. The background is blurred, showing more of the machine's structure.

Solutions for  
**efficient**  
**final packaging**

THIS IS WHO WE ARE

# Knecht is the expert on erecting, filling and sealing

Maschinenbau Knecht is a medium-sized and owner-managed company with over 25 years of experience in erecting, filling and sealing shipping cartons. We work with renowned companies in the industry, specifically in the Benelux countries as well as in Austria and Switzerland. At our location in Weisel, we plan, design, program, manufacture, and assemble our machines.

On our mission to find the best solution for our customers, we have about 30 long-standing employees. The reason for this is that we do not sell machines off the rack. We design, construct and optimise according to our customers' requirements. And that is what sets us apart. Not only do we offer special technical solutions and our expertise, we also offer maximum flexibility and we are happy to answer any questions our customers may have!

It is easy to integrate individual Knecht machines into your existing site. You may also consult us and learn about completely new solutions from scratch. The modular design of our machines allows us to customize our solutions and adapt to your needs quickly and flexibly. For many years, the numerous machines in our portfolio have proven successful in a wide array of industries.

Our range of products and our service portfolio cover your plant throughout the entire life cycle:

- ◆ Solution Development/Planning
- ◆ Assembly
- ◆ Commissioning/Training
- ◆ After Sales Service

**1984**  
Maschinenbau  
KNECHT GmbH is  
established

**1990**  
Norbert Sandmann takes  
over the management of  
the company

New construction of  
the final assembly  
hall and extension of  
the office building

**2015**  
Advancement of  
the product range:  
Tray Erector and  
Capping Machine

**2018**  
Expansion of the  
service and maintenance  
department

## SERVICES

# Customer-oriented and customized

**Carton erectors** in different performance ranges with different sealing systems (hot glue or self-adhesive tape) are part of Knecht's portfolio.

Knecht offers **tray erectors** with a capacity of up to 20 trays / minute.

In the **area of packing**, Knecht offers top loading systems. Our top loading systems are available as stand-alone machines or as a combination of an integrated carton erector and carton sealer. Thanks to their modular design, our top loading systems are suitable for a wide variety of products and tasks (including PET bottles, glass bottles, bags, folding boxes).

The Knecht portfolio includes **carton sealers** in different performance ranges and at different levels of automation with different sealing systems: Hot glue, self-adhesive tape or wet adhesive tape.

Knecht's **lid applicators** are available in different performance ranges and at different levels of automation and we are happy to customize them to your specific application. The combination of a carton sealer and a lid applicator in one machine is of peculiar interest.
